## Group Counselling - Adult (16yrs+)

**Summer 2026**

### **CBT for Depression**

This Cognitive Behaviour Therapy Group for depression is a supportive and educational 12-session group designed to teach participants skills to cope with feelings and symptoms of depression and anxiety.

### **Ongoing Peer Support**

This weekly peer led, clinician facilitated group is for anyone experiencing stress, mental health or emotional distress issues. Based on group needs, the session will focus on support, psycho-education, and tools for building coping strategies

### **DBT Skills Group**

Using Dialectical Behavioural Therapy techniques, this skills group helps people introduce effective and practical skills into their lives, which they can use when they are distressed. These skills are meant to replace other unhealthy and negative behaviours.
